RS-074-3/4

Battery-Operated
Water Heater Leak
Detection & Automatic
Water Shut-Off System

Shut-off unit is
installed on the cold
water feed line, and
the attached **water
sensor** is placed at the
base of the tank

If the sensor detects
a leak, an alarm
sounds and the valve
automatically closes
to prevent extensive
flooding and
water damage

Full port, lead-free 3/4" valve

Twice monthly
self-cleaning valve cycle

Includes two CR123 lithium
batteries, 4-year battery life
with low battery alert
