

CASE STUDY

Server Room Flooded

LOCATION

Wisconsin County dispatch center.

PROBLEM IDENTIFIED

The washroom on the second floor of the dispatch center developed a clog from public use and flooded, leaking into the server room below and causing approximately \$100,000 in damage.

SOLUTION

RS-080 was installed in a chase between bathrooms, and sensors were installed in every stall and below all sinks.

The system is connected to the hallway auditory alarm.
